

“Old School Meets High Tech”

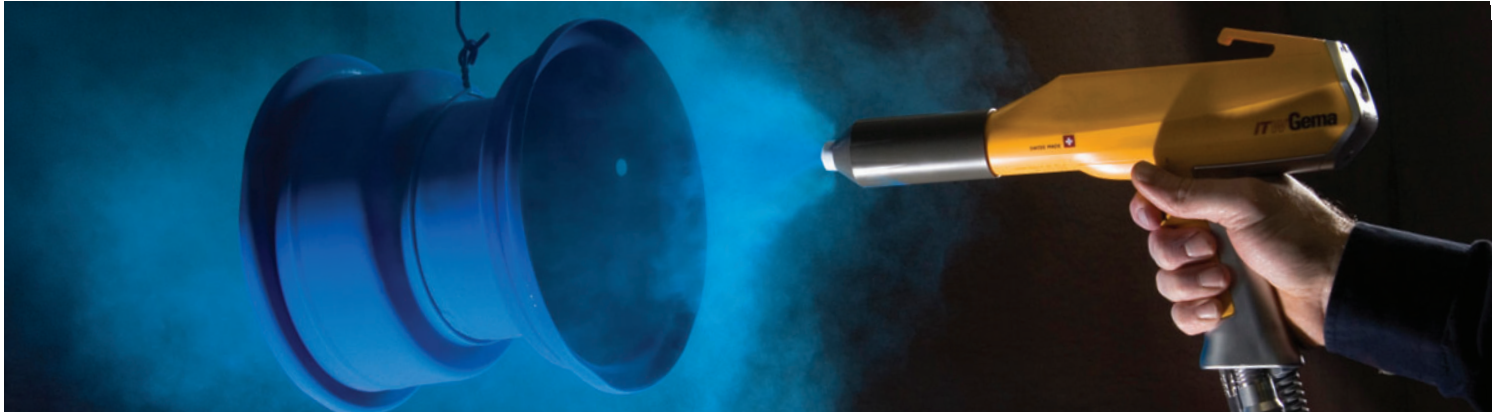

Old School know-how with proven Best Practices and the Latest Technology Solutions

MAY 4 & 5
Houston, TX

JUNE 21 & 22
Chicago, IL

AUGUST 10 & 11
Pittsburgh, PA

OCTOBER 7 & 8
Orlando, FL

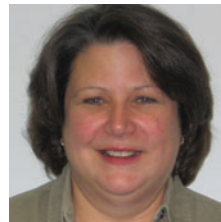

THIS WORKSHOP is designed for powder coating attendees with varying levels of experience – whether you have beginner, intermediate, or advanced powder coating knowledge – this workshop will improve your skills and understanding of all aspects of powder coating. Instructed by experts in the powder coating industry, this intensive two-day course uses “Old School” know-how with proven “Best Practices” and the “Latest Technology Solutions.”

This workshop will cover topics such as:

- Powder manufacturing, chemistry and selection
- Pretreatment
- Equipment selection, application issues, and maintenance
- Oven and cure issues
- Troubleshooting & tricks of the trade

FEATURED SPEAKERS

Diane Patterson
Diane has over 20 years experience in the pretreatment field including 6 years with the A Brite Company, both in sales and technical support.

A.J. Smotherman
ITW Gema
A.J. has 24 years of experience with ITW Gema working in the Application Lab and as R & D Process Engineer, currently in Distribution Sales and Technical Support.

Travis Stirewalt
TIGER Drylac
Travis has engaged and entertained classes with his energetic technical approach for nearly 7 years. He is Sr. Sales Manager for the East Coast at TIGER Drylac Powder Coatings.

If you want to gain a better understanding of the entire powder coating process, register online at www.itwgema.us/powdercoatingworkshop.

Classroom space is limited, so sign up today! For class agenda or additional questions, please visit our website or contact Karen Walters at kwalters@itwgema.com or (317) 298-5072.
